

**UCHEMBERE WABWINO MARTENITY CLINIC  
ANNUAL REPORT 2022**

*Where Every Life Matters*

## About

Uchembere Wabwino Maternity (in English is called Safe motherhood) is located in the northern region of Malawi in Mzuzu, Mzimba District. The clinic provides sexual reproductive health services to the people in the community and beyond with focus on reducing complications and management of maternal and child health issues. Uchembere Wabwino Maternity is a locally led organization which is determined to improve the lives of the people within its catchment area and in rural areas of Mzimba district.

We believe that every life matters and it is our responsibility to provide quality services to our clients in the communities.

## **A** Message from the **Executive Director**

Dear Friends and Partners,

On behalf of Uchembere Wabwino I present to you the annual report for 2022. During this year we have had major milestones, in terms of client's impact and growth as an organization. In 2022 we served 1794 people who came for sexual reproductive health services at our clinic, we gave immunizations to 3600 under five children and introduced a program for sexual reproductive health education and information in 15 secondary schools. We also managed to introduce a new service, laboratory which will be used for diagnostic laboratory test such as Full blood count, Grouping and cross matching, biochemistry analysis and electrolyte analysis. We also managed to purchase some of medical equipment for theatre such as theater bed, anesthesia machine, electrocardiogram machine to help us during emergencies such as the need for caesarean section when labour is failing to progress in order to save the life of the mother and that of the new born.

We introduced 4 outreach clinics to the remote areas of Mzimba to increase access to sexual reproductive health in collaboration with Mzimba north DHO. These are existing outreach clinics under Mzimba north DHO and we work with them to increase access to sexual reproductive health services.

Our outreach clinics have helped us to create memorable stories for women to have access to advanced maternal care such as Ultrasound scanning services within their reach and prompt referral to higher facility whenever there is a need.

I am very grateful for the support and team work that we currently have. Without your efforts the clinic would not have been where it is as of today.

Thank you very much.

With deep gratitude and respect,

*L. Msukwa*  
Lucy Msukwa

# SERVICE MILESTONES

## Maternal and Child Health

Under-five 3600

Sexually transmitted infections 160

Family planning 226

Cervical cancer screening 40

HIV and counselling 118

Out-patients 965

ANC 210

Labour & delivery 75

# ADOLESCENT SEXUAL REPRODUCTIVE HEALTH RIGHTS

We conducted a survey and found that most adolescents are getting unwanted pregnancies and sexually transmitted infections. Disseminated information about sexual reproductive health to 1000 received information, 500 accessed sexual reproductive health services like HIV testing and counseling, Family planning methods, treatment of STI'S.

# INTRODUCING NEW SERVICES

## LABORATORY SERVICES

In 2022 we saw that we have a need for laboratory services, our clients would come for a service and when it came to diagnosis using laboratory investigations, we were failing because we did not have the capacity to do that. This felt incomplete as we were referring patients to other facilities for laboratory investigations. In order to close the gap, we introduced laboratory services to provide holistic care to our clients with hope that other health facilities too may benefit from our services by referring clients to us for further diagnostic investigations.

## THEATER

We plan to introduce theatre which will be used to conduct minor surgeries for example caesarean section, total abdominal hysterectomy and tubal ligation. We have been having challenges when a pregnant laboring woman has prolonged labor or when her labor has failed to progress. Normally, we rush with a patient to a higher facility which takes some minutes to reach the destination depending on traffic in the road and this has been very challenging because we want to provide a safe space for women to deliver. So, the introduction of the theatre will ease the burden and will increase trust from our clients that if things will not go well in a normal process, surgery will be conducted in order to save a life, because we believe that every life matters.

# PARTNERSHIPS

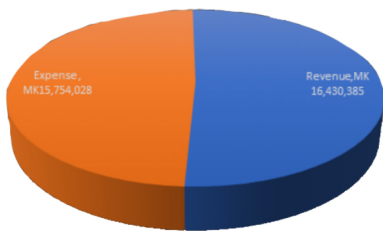

We received a grant from Growth Accelerator Malawi for the laboratory which is restricted funding.

## OUR IMPACT STORY

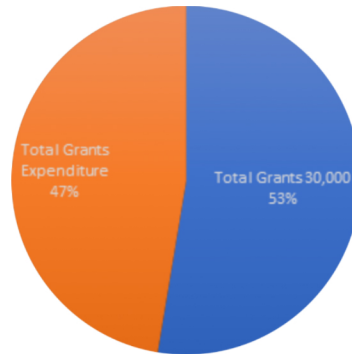

Mwayi is a 16-year-old girl who came to our clinic to seek for antenatal care. She had an early pregnancy. It was unplanned and an unintended pregnancy, and using our Ultrasound scan we diagnosed her with having a set of twins. She went through the whole process of antenatal care and she delivered the twins normally without any complication. Now Mwayi and the twins are doing fine, we regularly check on them and she is continuing with her education. When she finishes her education, she says she wants to be a nurse so that she should also help other people.

# FINANCIAL UPDATE

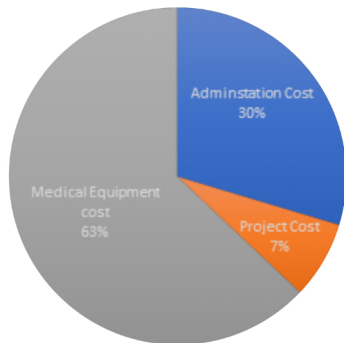

**FINANCIAL UPDATES 2022 (MK)**

- Expense
