BACKGROUND

Uchembere Wabwino Maternity Clinic is a dedicated healthcare facility committed to providing comprehensive maternal, neonatal, and child healthcare services. Our primary focus is on ensuring safe pregnancies, deliveries, and overall improved health outcomes for women and children. The year 2024 marked a significant milestone for the clinic, with the introduction of a maternity theater to provide surgical interventions for complicated pregnancies. This development has enhanced our ability to manage high-risk obstetric cases and reduce maternal and neonatal mortality. Additionally, the clinic expanded its professional team by recruiting four nurse midwife technicians and two clinical officers to enhance service delivery and improve maternal and child health outcomes.

OUR VISION STATEMENT

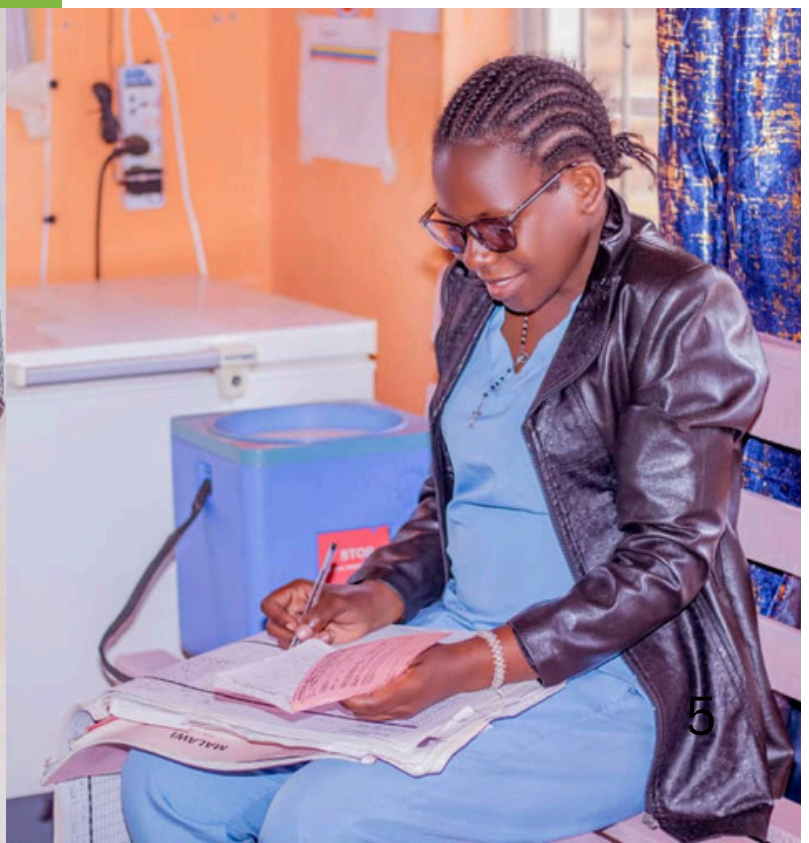

To provide equal access to safe and appropriate sexual reproductive health services to women across Malawi regardless of their social economic status.

OUR MISSION STATEMENT

To provide a safe place for delivery for women, empower young people through sexual reproductive health education and counseling and improve access to information and family planning services.

A Year's Overview

IMPACT AND ACHIEVEMENTS

The clinic has made notable strides in delivering healthcare services to the community. Below is a breakdown of the key statistical highlights for the year 2024: Maternal and Reproductive Health Services:

- Deliveries Conducted: 400 safe deliveries, ensuring maternal and newborn well-being
- Antenatal Care Visits: 1172 women attended prenatal check-ups to monitor their pregnancy progress
- Ultrasound Scans: 1591 pregnant women received imaging services for better pregnancy management
- Post Abortal Care: 269 women (ages 18–34) received medical care following pregnancy loss
- Cervical Cancer Screening: 1290 women were screened for early detection and prevention of cervical cancer
- Family Planning Services: 2243 women received contraceptive methods and reproductive health counseling

Child and General Healthcare Services:

- Outpatient Services: 1865 women and men received general outpatient care
- Child Immunization: 3851 children under two years received vaccinations, including polio, measles, DPT, and rota vaccine
- Growth Monitoring and Nutrition Assessment: 1,409 under-five children were monitored for growth and nutritional status
- Total Under-Five Children Seen: 2,260 children received medical attention at the clinic
- Delivered maternal health services to over 500 women in rural communities of Mzimba
- 10 community outreach events supported by DAK-Family Foundation
-

A Year's Overview

IMPACT AND ACHIEVEMENTS

Sexual and Reproductive Health Services:

- STI Treatment: 158 women and men were diagnosed and treated for sexually transmitted infections
- HIV Testing and Counselling: 1101 clients accessed voluntary HIV testing and counseling services

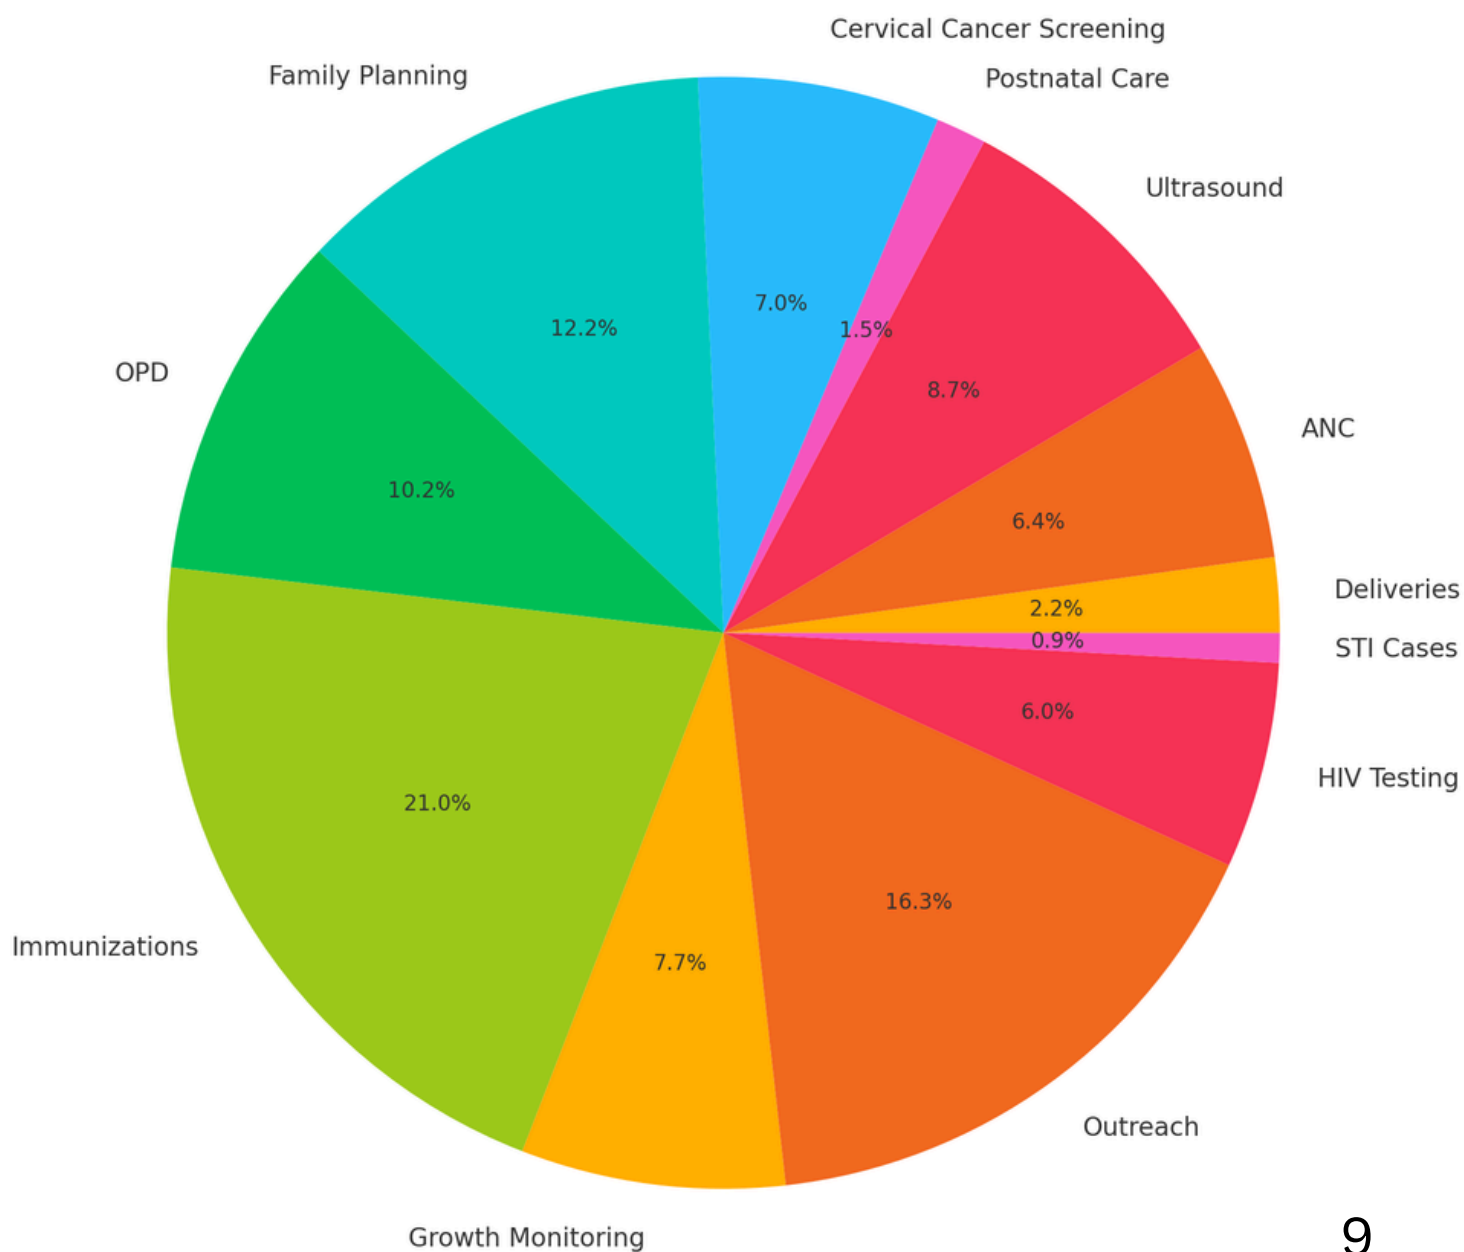

One of the most transformative developments in 2024 was the establishment of our maternity theater, enabling the clinic to provide surgical interventions for complicated pregnancies. This service has been instrumental in reducing maternal and perinatal mortality by offering life-saving procedures such as cesarean sections and emergency obstetric care. The maternity theater is equipped with modern medical technology to ensure safe and effective surgical outcomes for expectant mothers experiencing high-risk pregnancies.

**SHARON MPHAMBA- NURSE MIDWIFE
TECHNICIAN**

Recognizing the need for enhanced healthcare provision, the clinic expanded its team by recruiting six new professionals:

**Four Nurse Midwife Technicians – providing direct maternity and postnatal care services
Two Clinical Officers – offering direct patient diagnosis, treatment, and management of maternal and child health conditions**

The additional staff members have significantly improved service delivery, reducing patient waiting times and ensuring quality care for all clients.

OUR STORIES

SUCCESS STORY: EMPOWERING YOUTH THROUGH HEALTH EDUCATION AND CARE

Transforming Youth Health at Uchembere Wabwino Maternity Clinic

Introduction: Addressing the Challenges Youth Face

Adolescents and young adults often face significant barriers to accessing sexual and reproductive health services, including stigma, misinformation, and limited healthcare access. Recognizing these challenges, Uchembere Wabwino Maternity Clinic launched a Youth Health Program aimed at providing comprehensive education, clinical services, and psychosocial support to young people. The program's goal is to empower youth with knowledge and resources that promote informed health choices, prevent unintended pregnancies, reduce sexually transmitted infections (STIs), and improve overall wellbeing.

Program Implementation: Creating Safe Spaces for Youth

The Youth Health Program was designed to provide youth-friendly services, ensuring that young people feel comfortable seeking care. Key components of the program include:

- **Health Education Sessions:** Covering topics such as contraception, STI prevention, menstrual hygiene, and mental health.
- **Confidential STI and HIV Testing and Treatment:** Encouraging early diagnosis and intervention.
- **Adolescent Family Planning Services:** Offering tailored contraceptive counseling and services.
- **Post-Abortal Care and Counselling:** Providing medical support and emotional guidance for young women.
- **Growth and Nutrition Monitoring for Adolescent Mothers:** Ensuring young mothers receive adequate care for themselves and their children.

OUR STORIES

SUCCESS STORY: EMPOWERING YOUTH THROUGH HEALTH EDUCATION AND CARE

Impact: Changing Lives, One Youth at a Time

Since its inception, the Youth Health Program has had a profound impact on the community. In 2024, the program achieved the following milestones:

- Over 13000 young people participated in health education sessions, increasing awareness about reproductive health.
- 175 adolescents accessed confidential STI and HIV testing services, leading to early detection and treatment.
- 120 young women received family planning services, reducing the rate of unintended pregnancies.
- 45 young women accessed post-abortion care services, ensuring safe recovery and emotional well-being.
- 85 adolescent mothers participated in growth monitoring and nutrition assessment for their infants, promoting better health outcomes.

OUR STORIES

SUCCESS STORY: EMPOWERING YOUTH THROUGH HEALTH EDUCATION AND CARE

Success Story

From Vulnerability to Confidence

One inspiring story is that of Mercy, a 19-year-old girl who came to Uchembere Wabwino Maternity Clinic with health concerns and uncertainties about her future. Mercy had limited knowledge about contraception and feared stigma in seeking healthcare services. Through the Youth Health Program, she attended several educational sessions, received counseling, and eventually chose a family planning method that suited her needs. Today, Mercy is pursuing her studies with confidence, advocating for reproductive health awareness among her peers, and helping break the cycle of misinformation.

COMMUNITIES OF MZIMBA**

WAY FORWARD: STRATEGIES FOR GROWTH AND SUSTAINABILITY

To further achieve our mission and vision, Uchembere Wabwino Maternity Clinic has outlined key strategic priorities:

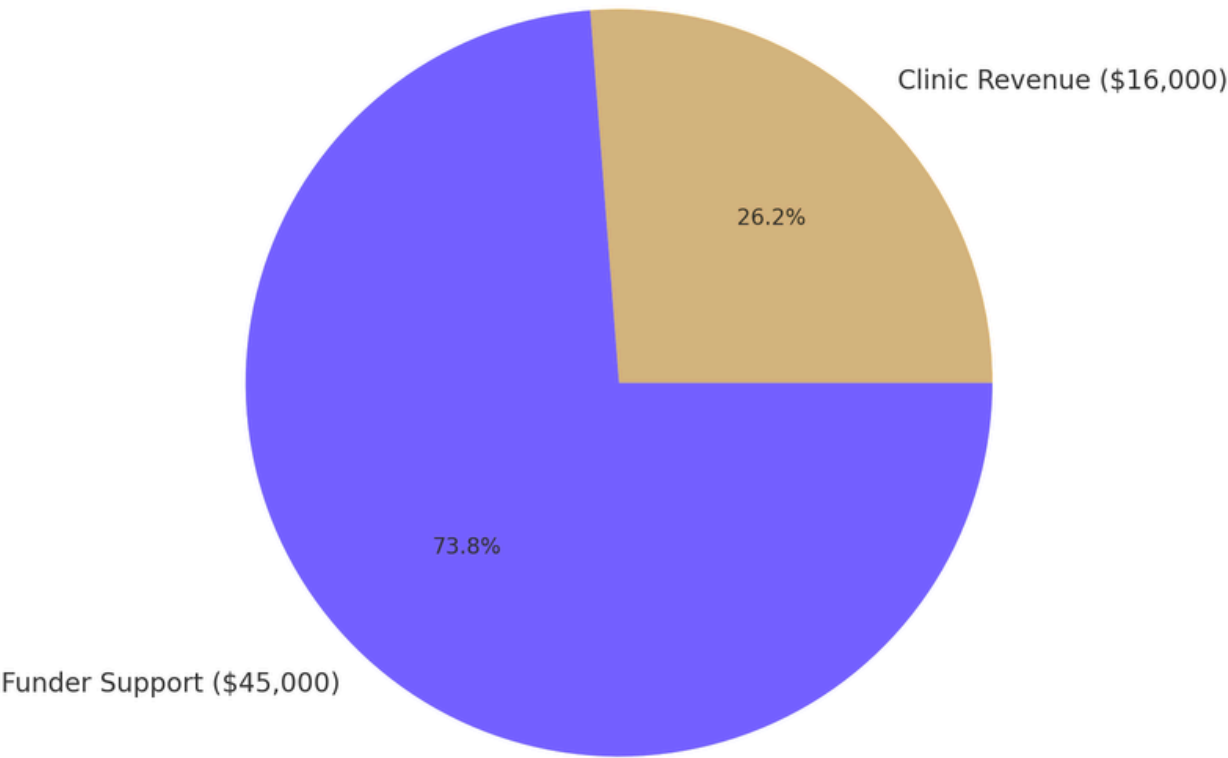

- **Increasing Community Outreach:** Expanding awareness programs to promote early antenatal care attendance and safe childbirth practices
- **Enhancing Family Planning Services:** Encouraging greater access to contraceptive methods to improve reproductive health choices
- **Strengthening Maternal and Child Health Education:** Providing health education sessions to pregnant women and caregivers
- **Scaling Up Cervical Cancer Screening:** Increasing coverage to detect and prevent cervical cancer at an early stage
- **Expanding Postnatal and Neonatal Care Services:** Ensuring that mothers and newborns receive comprehensive follow-up care
- **Investing in Advanced Medical Equipment:** Upgrading the maternity theater and other essential services to improve clinical outcomes
- **Continuous Professional Development:** Providing ongoing training for healthcare staff to enhance skills and service quality

CONCLUSION

The year 2024 was a year of tremendous growth and impactful service delivery at Uchembere Wabwino Maternity Clinic. The introduction of a maternity theater, recruitment of additional healthcare personnel, and the provision of essential maternal and child health services have significantly improved healthcare outcomes for the community. As we move forward, we remain committed to our mission of ensuring safe pregnancies, healthy children, and quality healthcare for all. Through continuous improvement, community engagement, and strategic investments, Uchembere Wabwino Maternity Clinic will continue to be a beacon of hope for maternal and child health in our region.
